Summary

Skilled in React.js with a passion for becoming a MERN stack developer. Currently expanding expertise in Node.js, Express, MongoDB, Next.js, and React Native for full-stack and mobile app development.

Education

Bachelor of Computer Science

The University of Faisalabad

2019-2023

Experience

CSOFT

Web development

Recently, I'm working as a React developer in a software house named Csoft. I develop multiple types of front end designs and also taking hand-on experience to handle the back-end of an application with Node, Express, and MongoDB

Aims Sol

Web development| Internship

During my internship as a web developer at Aim Sol Technologies, I contributed to several key projects, implementing responsive design principles using HTML, CSS, Bootstrap, Tailwind CSS, and React.js.

Bit-Brick Technology

Web development| Training

As a fresher with hands-on experience in building responsive and user-friendly web applications using React.js and Tailwind CSS. Proficient in creating modular components, managing application state with hooks like useState, useEffect, and useContext, and implementing efficient routing systems. Adept at leveraging Tailwind CSS to design visually appealing and consistent UI, ensuring an optimal user experience across devices.
